

True Cyber Security for Defense Against Evolving Threats

In the past few years, cyber-attacks have evolved to be a dangerous threat to virtually every business. “In 2017 alone there been 53,000 incidents and 2,216 confirmed data breaches.” GlobeNet’s Managed Security Services provides the protection that your business needs to operate in the new landscape of threats, such as: advanced persistent threats, ransomware, malware, phishing, social engineering and more.

End-to-End Security Backed by a Team of Experts

GlobeNet’s Security is backed by a team of cyber security experts who can address threats as quickly as possible. Together, we provide a powerful combination of software and services, including:

- Advanced monitoring, detection, response and remediation services to stop active threats and minimize harm.
- Intelligent reporting and documentation capabilities, including real-time alerting, network log and activity monitoring.
- Threat profiles that map to specific attack vectors and protection needs, with real-time alerting when a system or site reaches risk levels that are above acceptable thresholds.

GlobeNet’s Holistic Security Approach

Our security solution provides granular visibility into security gaps, and includes end user training, a suite of advanced tools, and can even help you demonstrate compliance and adherence with regulatory requirements. GlobeNet's comprehensive cyber security framework incorporates industry standards, Defense in Depth strategies and interoperability to help you manage risks and protect your bottom line. Our services include but are not limited to the following:

- **Advanced Threat Protection**
- **Next-Generation Firewalls**
- **Email Security Filtering**
- **Security Incident Event Management (SIEM)**
- **Next-Generation Endpoint Protection**
- **Layered Sandboxing**
- **Security Operations Center (SOC)**
- **HIPPA/PCI Compliance & Auditing**
- **Dark Web Monitoring**
- **Email Phishing Campaigns**
- **Vulnerability Management**
- **Security Awareness Training**
- **Backup and Disaster Recovery**
- **Threat Analytics and Reporting**

The dangers of cyber threats are growing by the day and continue to accelerate. Every industry will face unique threats and there is no “Silver Bullet” to protect you. Being prepared requires strategic, intelligent and proactive complete cyber security management from GlobeNet.
